

Our Company

QSI CERT is built on strong core values of,

Building Trust and Confidence

QSI CERT has been designed to build trust and confidence that certified data processing are compliant with the applicable European data protection regulations.

Integrity

Auditors and personnel of the Certification Body involved in a QSI CERT certification process shall perform their work with honesty, diligence and responsibility. They must apply the Certification Scheme requirements with professionalism and impartiality.

Evidence-based Approach

Audit findings and conclusions are based on objective evidence of conformity (or nonconformity), which are relevant to the audit criteria.

Confidentiality

QSI Cert have procedures and policy for protecting the confidentiality of the information acquired in relation with certification process.

Openness

QSI CERT discloses information on its certification process and the certification status of its Clients, while protecting confidentiality where it applies.

Non-discrimination Conditions

QSI CERT make its services accessible to all applicants whose activities fall within the scope of its operations and for which it has the required resource. Decision to accept or refuse a client shall be based on objective and proportionate reasons.

Addressing Emerging Technologies

QSI CERT has been designed to encompass risks related to emerging technologies, as well as to leverage on state-of-the-art technologies to support certification processes.

Independence

QSI CERT auditors are independent of the activity being audited and must act in a manner that is free from bias and conflict of interest

Impartiality

QSI CERT ensure impartiality in their certification processes. They remain fair and unbiased in all their dealings and ensure that their decisions are not influenced by other interests or by other parties.

Fair presentation

Audit findings, conclusions and reports should reflect truthfully and accurately the audit activity.

Continuous Improvement

QSI CERT Certification Scheme has been designed to apply and benefit from continuous improvement under the authority of an international board of experts.

Safeguarding our Core Values and Principles

In the event of a justified suspicion of undue influence, which could jeopardize the preservation of the above-mentioned principles, the Executive Board of the Certification Body should be informed.

Why choose QSI?

QSI-CERT has a team of Auditors and Technical Experts who can conduct value-added Audits, inspection and testing activities. Our TEAM contribute in the continual improvement of our organization and shape your problems into the best solutions.

CODE OF ETHICAL PRACTICES

Our principles of ethical standards are guided by the following core values:

- ✓ Integrity in our decisions and actions.
- ✓ Competency in our skills and professions.
- ✓ Value in our economic contributions to employers & amp;
- ✓ Responsibility in our social contributions to Society.

WE HANDLE YOUR COMPLAINTS IN BEST POSSIBLE WAY!

An applicant, a certified company or any interested party may appeal against a decision of QSI-CERT. The matter is referred to the Appeals Panel whose decision is final. In the event of an applicant, Certified Company or any interested party, wishing to contest any decision of QSI-CERT, he shall, within 14 days after having been officially informed of such a decision, give notice in writing to QSI-CERT of his desire to appeal against the decision.

Our Journey

ACHIEVING GLOBAL EXCELLENCE

Our experts help organizations and individuals improve personal competence and skills by providing them with the best training solutions. Working globally, our professionals cover multiple areas and industries to provide you with the best development solutions and innovative learning. Our services are available in both environments, face-to-face and e-learning, ensuring ease for all our clients.

Compliancy Group

“The Health Insurance Portability and Accountability Act (HIPAA) set the standard for sensitive patient data protection. Companies that deal with protected health information (PHI) must have physical, network, and process security measures in place and follow them to ensure HIPAA Compliance. Covered entities (anyone providing treatment, payment, and operations in healthcare) and business associates (anyone who has access to patient information and provides support in treatment, payment, or operations) must meet HIPAA Compliance.”
